

# Online Survey (Study B)

## Introduction

You are invited to participate in a research study regarding user-facing configuration risks in multi-user Internet of Things (IoT) environments. The goal of this study is to understand how users perceive security and privacy risks when smart devices are shared among multiple people. Please read the following information carefully before participating.

## Purpose:

This study investigates how users perceive potential security and privacy risks associated with smart home device configurations involving multiple users. Your responses will help inform the design of safer IoT systems.

## Procedure:

You will be shown a short video (approximately 1-2 minutes) depicting a smart home scenario and potential risks. You will then be asked to complete a questionnaire about your perceptions of that scenario. The total time required is approximately 5 minutes.

**Voluntary Participation:** Your participation is entirely voluntary. You may withdraw at any time without penalty.

**Confidentiality:** Your responses are anonymous. No personally identifiable information will be collected or linked to your answers.

**Risks:** There are no anticipated risks beyond those encountered in everyday life.

**Contact:** Many thanks for your time and contribution. If you have any questions, please contact [liuyic@iu.edu](mailto:liuyic@iu.edu).

If you agree and want to continue, please choose agree.

A. Agree

B. Exit

Please watch a short video (approximately 1-2 minutes) depicting a smart home scenario and potential risks.

Please copy the link below to open and view the video in your browser:

<https://drive.google.com/file/d/1TnGlxiwbS9zX-uhrh3P7kEhEgXby8TQR/view?usp=sharing>

[Attention check]

In the video you just watched, what was the primary device involved in the scenario?

- A. Smart Fridge
- B. Smart Lock
- C. Smart Speaker
- D. Smart Thermostat

1. How would you rate the scenario shown in the video in terms of security or privacy risk?

Please select one:

- A. Not at all risky
- B. Slightly risky
- C. Moderately risky
- D. Very risky
- E. Extremely risky

2. Based on the video, what is the reason for your rating? (Short answer, 1-2 sentences)

\_\_\_\_\_

3. If in Question 1 you felt this scenario involved risk, what additional features or interface designs do you think would be needed to reduce this risk? (Short answer, 1-2 sentences)

\_\_\_\_\_
